

Porpoise Survey Data Sheet

Site Name– Quendale Bay Observer..... Date.....

Wind direction:

Wind Speed (mph):

Start time	End time	Sea state	Visi- bility	Boat num- ber & type	Porpoise Y/N	Total num- ber of por- poise seen	Number of calves	Other marine mammals?

Notes-

If undertaking a count of individuals is difficult, please use the following ranges to estimate number **per group**:

1-5, 6-10, 11-25,
26-50 and 50+

Use this section to add further detail about sighting. For example, were they transiting through an area or milling around. Were any particular behaviours observed such as one individual rushing towards another at speed?

Please mark as much detail as possible on the map below, mark number and location of individuals and arrows indicating direction of movement in the area. If sea state varied over the location, mark this on the map and add any details on boat numbers, types and movements.

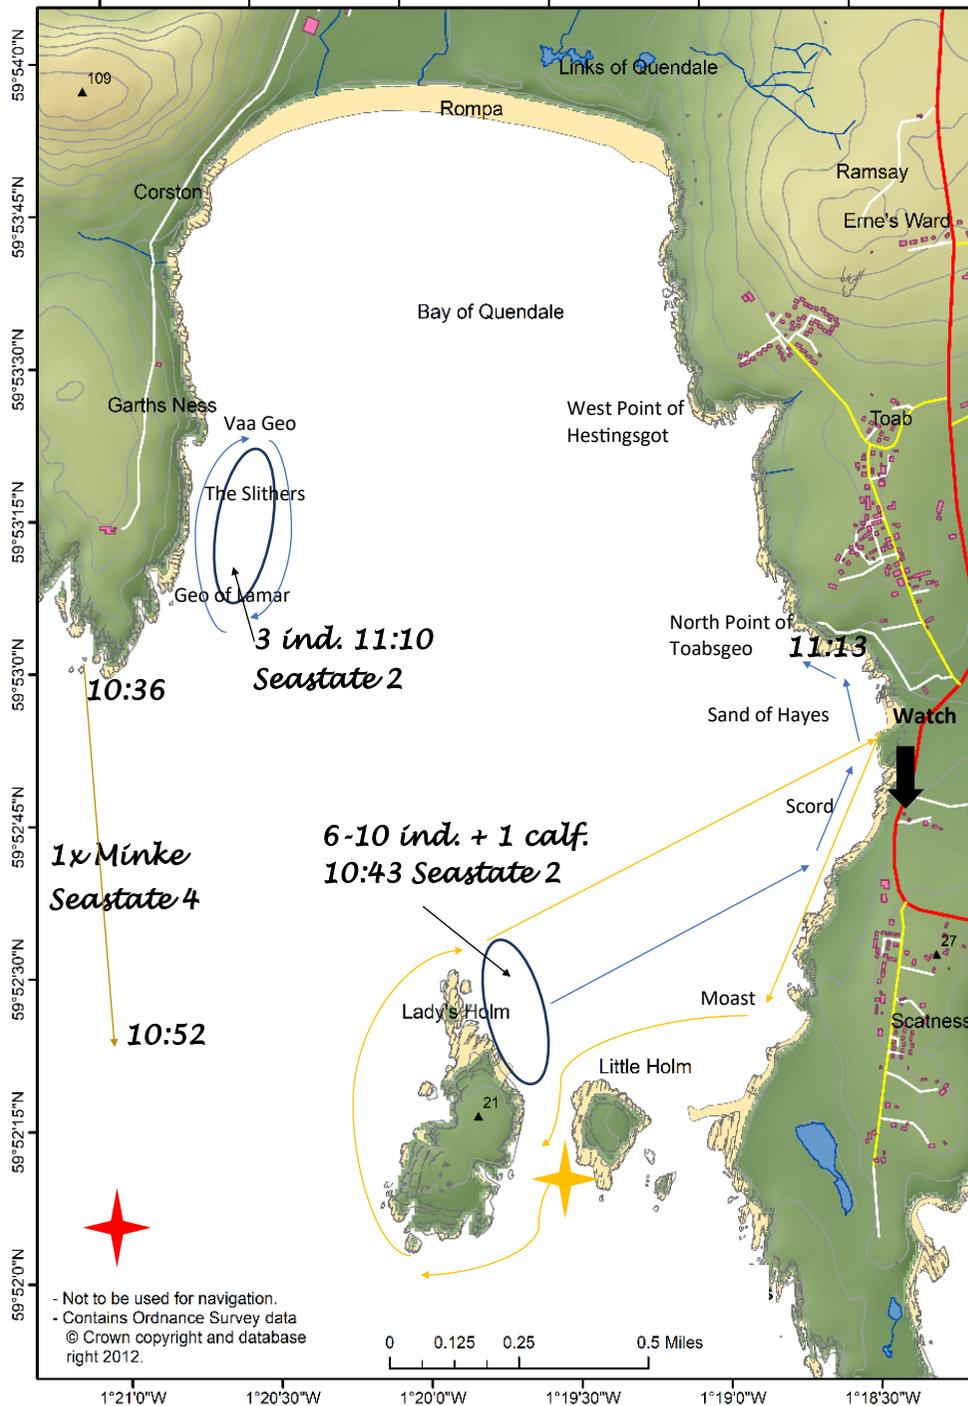

Porpoise Survey Data Sheet– EXAMPLE

Site Name– Quendale Bay Observer *J. Smith* Date 21/09/2021

Wind direction: NE

Wind Speed (mph): 15

Start time	End time	Sea state	Visi- bility	Boat number & type	Porpoise Y/N	Total num- ber of por- poise seen	Number of calves	Other marine mammals?
10.30	11.30	2-4	1	1-SM 2-kyk	Y	approx. 14	1	1-minke

Notes-

Group of 6-10 plus a calf first seen at 10.43 below Lady's Holm in sheltered water (seastate 2) moved northeast below runway then slowly north along coast into Quendale Bay and lost from view at North Point of Toabsgeo at 11.13.

If undertaking a count of individuals is difficult, please use the following ranges to estimate number per group:

1-5, 6-10, 11-25,
26-50 and 50+

Second group of 3 seen at 11.10 on west coast below Garthsness along The Slithers and seemed to be milling around that area between Geo of Lamar and Vaa Geo.

Minke seen transiting through area. First appearing from behind Garthsness area at 10.36 then moving south and lost from sight behind Lady's Holm at 10.52.

Pair of Kayaks ✨ launched from Sand of Hayes (10:35) and paddled along coast to little Holm and Lady's Holm before returning to launch site (11:25).

Small angling vessel ✨ drifting behind Lady's Holm (11:05)
